WHAT'S OFFERED IN THE IMAGING LAB?

Color Laser Printing

The Color Laser Printer is the fastest output we have. We print on Hammermill Color Laser paper, available in text weight and card stock, both of which can be printed double-sided. Sticker and Transparency papers are also available in 8.5"x11".

Inkjet Printing

We have several high quality inkjet printers in each lab. Paper sizes range from 13"x 19" sheets to 42" rolls and paper selection covers all standard photographic papers as well as fine art papers and alternative media. Pricing for these printers is dependent upon size and paper type. Please note that these papers can not be printed double-sided.

Business Solutions (Terra Only)

We offer a variety of products and services, including high volume black and white copies and prints, color booklets, trifold brochures, postcards, business cards and lamination.

Film Output (Anderson Only)

Our Scitex Dolev printer prints 18"x 24" sheets of photographic film. This film is used in many printmaking and photo processes including non-silver, offset lithography, polymer plate making, and screenprinting. Orders are processed in the Anderson ILab and the film is printed and developed in the Borowsky Center. Please see a technician in the Anderson Lab for more details.

Laser Cutting Service (Anderson Only)

The Anderson ILab is equipped with a Laser Cutter/Engraver that can engrave a variety of materials up to 18x32 inches. The Laser Cutter can mark, engrave, cut and produce graphic imaging on a variety of different materials. The lab currently holds a number of materials including Plywood, Masonite, Book Board, and Clear Acrylic. Clients are allowed to submit their own materials for laser cutting, but first must check with the ILab technician and submit a sample piece for testing. Files must be submitted in Illustrator format and clients may refer to further instructions online, available at www.uarts.edu/printserices > Anderson Imaging Lab > Laser Cutter.

Viynl Cutting Service (Terra Only)

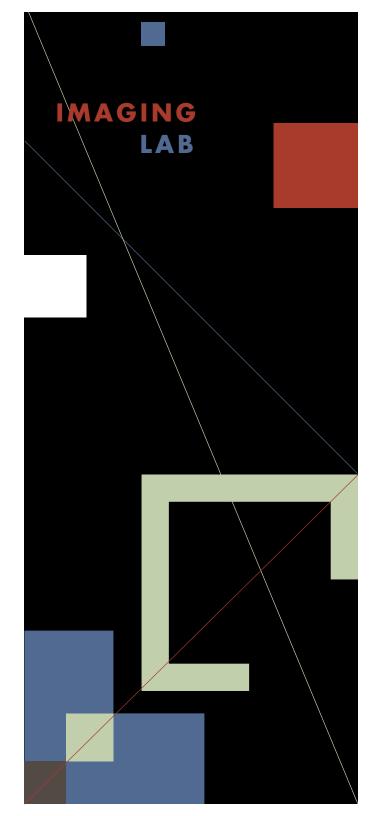

We offer vector-based vinyl cutting through use of our Graphtec RoboCraft Pro machine. We are able to make cuts as wide as 14.75" with letters as small as a 3/4" inch in height. We stock a variety of adhesive vinyls ideal for wall text or graphic applications. Please see a technician in the Terra ILab for more details.

Copier

For color copying on the Color Laser printers, students, faculty and staff need to punch in their UArts username and password on the touch screen. The same process applies for black & white copying throughout the campus. To add money to your copy account, visit a technician in either ILab.

WHAT WE DO

The Print Services' Imaging Labs are the digital print centers at the University of the Arts. We provide UArts students, faculty and staff with highly personalized customer service in an all-digital workshop.

HOURS AND LOCATION

Anderson Imaging Lab

333 S. Broad Street Philadelphia, PA 19107 215 - 717 - 6461 6th floor, room 616

Terra Imaging Lab

211 S. Broad Street Philadelphia, PA 19107 215 - 717 - 6693 13th floor, room 1316

Hours

Monday-Friday:

8 am-9 am Color Laser Printing Available 9 am-5 pm All Services Available

Saturday:

10 am-1 pm Color laser printing available

FILE PREP

At the Imaging Lab, we suggest: Packaged InDesign files High resolution PDFs Tiff files EPS files

Imaging Lab Staff will not resize, adjust or manipulate your files. Files must be ready to print when brought to the labs. If any changes are needed, the Imaging Lab will not print until the client fixes and supplies the corrected file. The Imaging Lab is not responsible for replacing missing fonts or images if they are not present in the file when opened.
